Profile Summary

Java Full Stack Developer (Fresher) with hands-on experience in building web applications using Java, Spring Boot, Hibernate, MySQL, and React.js. Skilled in developing RESTful APIs, backend systems, and database-driven applications using MVC architecture and DAO design patterns. Completed training with practical exposure to real-world application development and SDLC.

Skills

Programming Languages: Java, JavaScript

Frontend Technologies: HTML, CSS, Tailwind CSS, React.js

Databases: MySQL, MongoDB

Frameworks: Collections, Hibernate, Spring Core, Spring MVC, Spring Boot

Tools: Git, GitHub, VS Code, Eclipse IDE, Spring Tool Suite, MySQL Workbench, Postman

Concepts: OOP, JDBC, Exception Handling, Multithreading

Experience

Software Developer Trainee | Techonsy Software Pvt. Ltd.

01 Jan 2026 – 31 Mar 2026

- Assisted in developing and maintaining Java-based web applications using backend technologies and database integration.
- Supported debugging and testing activities, helping to improve application performance and reduce technical issues.
- Contributed to real-time development tasks/modules during the training period.
- Collaborated with team members in the Software Development Life Cycle (SDLC) to deliver reliable solutions within deadlines.

Projects

ATM System | Java, Spring Boot, MySQL, JPA (Hibernate)

- Built a full-stack ATM system using Spring Boot for backend development and React.js for frontend design.
- Created REST APIs for banking features such as balance check, cash withdrawal, cash deposit, and PIN change.
- Added a simple and responsive user interface for smooth user interaction and API integration.
- Used Spring Data JPA (Hibernate) for database operations and MySQL to store customer and transaction details.
- Followed Controller, Service, and Repository architecture to keep the code clean and organized.
- Performed CRUD operations to manage account and transaction data.

FreshCart (E-commerce Project) | React.js, Node.js, MongoDB

- Built a grocery e-commerce website using the MongoDB, React.js, and Node.js.
- Created a responsive user interface with product categories, search functionality, and product display features.
- Added login and signup functionality for secure user authentication.
- Connected frontend and backend using REST APIs for smooth data transfer.
- Used MongoDB to store product and user information.
- Added features such as product filtering, category-wise browsing, and mobile-friendly design for a better user experience.

Education

Bachelor of Computer Engineering

2021 – 2025

Late G.N. Sapkal College of Engineering, Nashik

- University:** Savitribai Phule Pune University
- CGPA:** 6.64

HSC (Higher Secondary School)

2020 – 2021

Savitribai Phule Junior College, MPKV, Rahuri

- University:** Maharashtra State Board of Secondary and Higher Secondary Education
- Percentage:** 77.50%

Certifications

Java Full Stack Development

Linkcode Technologies Pvt. Ltd.
